Still available - An Inexpensive Polarizing Microscope

Optical simplicity – and an attractive, low price – is achieved in the H/I 600 polarizing microscope by virtue of a "classical" microscope stand. Essential technical qualities are maintained plus several research features – including focusable Bertrand lens, individually centerable objectives on rotating changer, sliding analyzer with 90° rotation and a three-lens trip-out focusable condenser. Polarizer and rotating stage are graduated; illumination by high intensity low voltage source, or substage mirror.
